

Gunther von Hagens'

BODY WORLDS

The Original Exhibition of Real Human Bodies

& The Story of the Heart

Here's what parents and educators are saying about **BODY WORLDS**:

"As a parent and a healthcare professional, I can't wait to see this exhibit! I will be bringing my family as soon as it opens."

Liz Zentner, Utah PTA Health Commissioner

"...Students will have the opportunity to see the human body in a way that they could previously only imagine...No longer is the human body just a picture on a page, but rather it becomes something that a student can relate to, understand, and appreciate. The BODY WORLDS exhibit brings this study to life."

*Velma Itamura, Science Specialist,
Utah State Office of Education*

AN ANATOMY LESSON YOUR STUDENTS WILL NEVER FORGET!

Hosted by The Leonardo and presented by University Health Care, *Gunther von Hagens' BODY WORLDS 3 & The Story of the Heart* will take students and teachers on an eye-opening journey through the inner workings of the human body. *BODY WORLDS* exhibitions have opened to critical praise and public acclaim in 45 cities around the world and has been seen by more than 25 million people.

Never before has an exhibition offered such an intimate look at the human body. *BODY WORLDS 3 & The Story of the Heart* presents a one-of-a-kind anatomy and physiology lesson.

- Featuring a unique collection of more than 200 authentic human specimens, including whole-body plastinates, organs and translucent body slices, and a special presentation on the heart.
- This unique exhibition offers students profound insights into the human body, health and disease, and the intricate world of the cardiovascular system.
- Students will explore the locomotive, nervous, respiratory, circulatory, cardiovascular, digestive and reproductive systems.
- See muscles, bones and tendons that help us move; study the organs that allow us to fuel our bodies.
- View the complex pathways of our vascular system, and gain a true understanding and appreciation for human life.

The human body specimens in the exhibition derive from people who have, in their lifetime, generously donated their bodies for Plastination, to educate future generations about health.
